

# PUJA GROVER

2016

**TITLE:** LADY IN WHITE

**MEDIUM:** ACRYLIC ON CANVAS

**SIZE:** 24X24 IN

## **ABOUT THE ART WORK:**

My works are my conversations with myself. This work is a continuation of my works on human entanglements. The threads that are wrapped around the lady are symbolic of the entanglements of emotions, relations, social and our very own desires that we tie around ourselves. White colour symbolises the balance of all the colours in such a harmony that no colour over powers another. White carries all the colours of the spectrum in just the perfect balance. So I believe that we can be wrapped up with these entanglements but still create a balance and enjoy every colour that we are blessed with.

Exhibited in India, International Show in St. Petersburg Academy of Fine Arts, Russia.
